

CX2 – Radiator Brush

Product description

The CX2 is a range of high-quality radiator brushes featuring a sturdy wooden handle and a thick ferrule for increased bristle count and pick up capacity. The CX2 range offer excellent spreading rate and superior finish. The CX2 is well suited for both smaller and larger areas.

Bristles are made from a proprietary polymer blend with enhanced paint pick-up and release capacity for a smooth, even application. The unique fibre blend is optimized to achieve excellent coverage, a flawless surface finish, and resistance to strong solvents without shedding.

Typical usage

For use of all types of 2K and 1K coatings such as primers, topcoats, Epoxy PFP and antifouling's. Make it possible achieve the recommended paint thickness and wanted finish after paint suppliers' recommendations. Suited for all coatings but especially good for low viscosity coatings.

Typical WFT thickness

- Primers and topcoats: 100-125 microns
- High build (mastic): 225 - 300 microns

Coatings compatibility

- Epoxy
- Polysiloxane
- Polyurethane
- Alkyds
- Acrylic
- Zinc primers
- Epoxy PFP

Size	Product nr
35mm	200035
50mm	200050
70mm	200070
